

Village of St Anne

President's Report

September 14, 2009

1. Everyone except Randy has turned in the Village Goals analysis. Attached are the results of the survey. Please take some time to look this over and we will discuss this at next months meeting. I'd like to thank everyone who participated for their time and their interest in the future of the village. This information will help us determine some of our goals for the future.
2. Budgets – Rick Blanchette and I met a couple of weeks ago to discuss an operating budget for the village. Rick and I discussed a number of topics and we will be meeting again in a couple of weeks after he has completed our Audit. At the next meeting I will be including the Finance Committee.
3. Water Tower Grants – We may have some movement soon on this topic. Kathy from Rep. Lisa Dugan's office contacted me last week. She was looking for the Grant numbers and wanting to know what year these grants were issued. She has been speaking with a representative from the comptroller office. Once I know more, I will let you know.
4. Phoenix Fabricators. We have made a payment of \$5000.00 to this company last month. This brings our total outstanding debit with them to \$58,370.00. We may need to make another payment this month if we don't receive the grant monies from the State.
5. I received a letter from Rep. Lisa Dugan and Senator Toi Hutchinson informing me that our Village will be receiving \$100,000.00 for infrastructure repairs. At this time I do not know when we will be receiving this money or exactly what the money can be used for. I also do not know if this includes the \$25,000 that we requested to fix some of our roads in the Village. Again, I will let you know once I am given more details.
