

Village of St Anne

President's Report

April 16, 2012

1. **New Trash Receptacles for Station Street** – I have been working with the Beatification Committee and they would like us to purchase new black garbage cans for the downtown area. What they would like to do is have the cans secured to the sidewalks by metal grates that will be similar to the tree grates that we now have. These grates for the garbage cans will have one side that that opens so the cans can easily be taken out and emptied. The grates will have to be fastened to the sidewalks. This group will build the grates and we'll pay for the receptacles. Therefore, I would like to propose the purchase of at least 4 new trash receptacles for the downtown.
2. **Village Sign** – I have asked Duane Meier to submit a quote for the re-staining of the sign on the north side of town. Duane said the cost for the North Sign would be \$300.00. We paid \$400.00 last year for the south sign to be fixed and stained. Therefore, I would like to propose that we have Duane re-stain the North Village sign.
3. **New well** – The new well has everything installed in the well house. We are waiting on the C-II permit. I have signed the permits and Neil has submitted them. Our next step will be obtaining an operating permit. This should be our last step in putting the new well on line. Neil says he has a punch list of a few items that need to be completed before we actually take ownership of the well.
4. **New Street Signs** – I have signed the application for the new Street Signs in the Village. The County has been working with Gary Dionne on this project. We are supposed to be receiving new street signs for all the Village Streets. The State and County will handle the Streets that are State and County Roads. The only caveat is these signs need to be installed within one year.
