

Village of St Anne

President's Report

March 8, 2010

1. Water Tower Grants – I spoke with the Governors office again last Wednesday. Our payments for the two grants are still on his desk waiting for approval. A lady named Mary from the DCEC office is supposed to be calling me this week. She was asking for a hardship case for us. We'll see what happens. I'll stay on this.
2. Phoenix Fabricators. Again, we'll need to make another payment of \$5,000.00 to Phoenix this month. I spoke with Phoenix last week and told them where we were at with the State and close to getting paid. I told them that they are tops on the list to getting paid. To date we have paid them \$25,000 and we still owe them \$38,370 before this next payment. I'll keep in contact with them.
3. Committee Meetings – We need to have a police committee meeting to discuss the issue of Golf Carts and we need to have a Finance meeting to discuss pay increases for this coming year.
4. Federally funded projects – Neal submitted three projects for us to US Rep. Halverson. These projects are for her Municipalities and would be paid for with Federal funds. I believe I emailed these three projects to all of you. They were water main, sanitary sewer main and a road project.
